

# Moss Beach

## SR 1 CONGESTION AND SAFETY IMPROVEMENTS PROJECT

### Existing Conditions

Highway 1 in Moss Beach has safety and accessibility challenges, for example:

- Lack of stop signs, lights, or other traffic controls
- Difficulties for vehicles crossing or merging onto SR 1
- High speeds along the highway
- Limited infrastructure for pedestrians and bicyclists

Carlos St and Etheldore St looking north

Driveway along northbound SR 1, south of Marine Blvd looking south

Northbound shoulder SR 1 near 16th St looking south

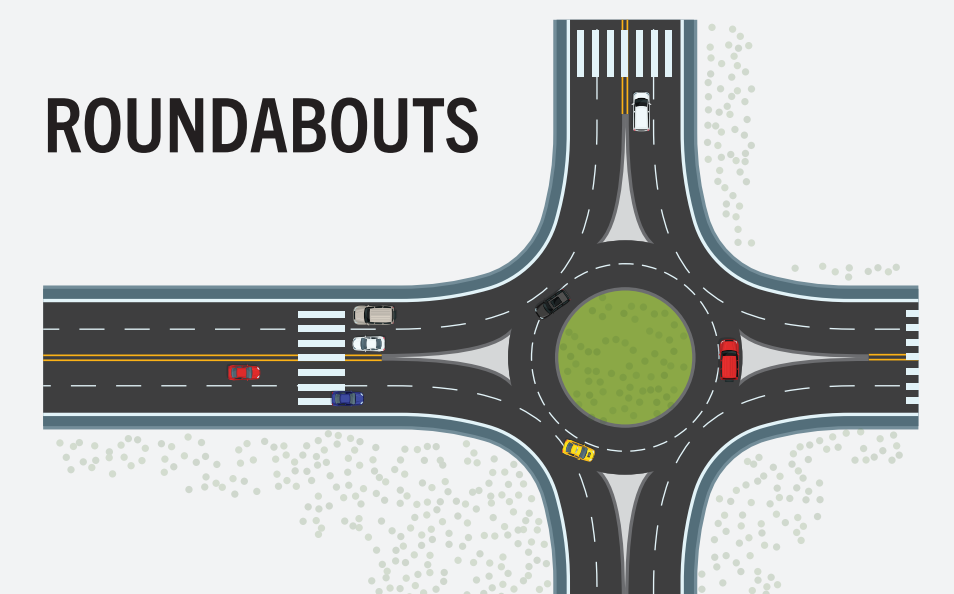

Cypress Ave looking south

### Possible Improvements

To improve traffic flow and safety within the project area and meet the needs of Moss Beach drivers, cyclists, pedestrians, and transit riders, the following improvements are being considered:

TRAFFIC SIGNALIZATION

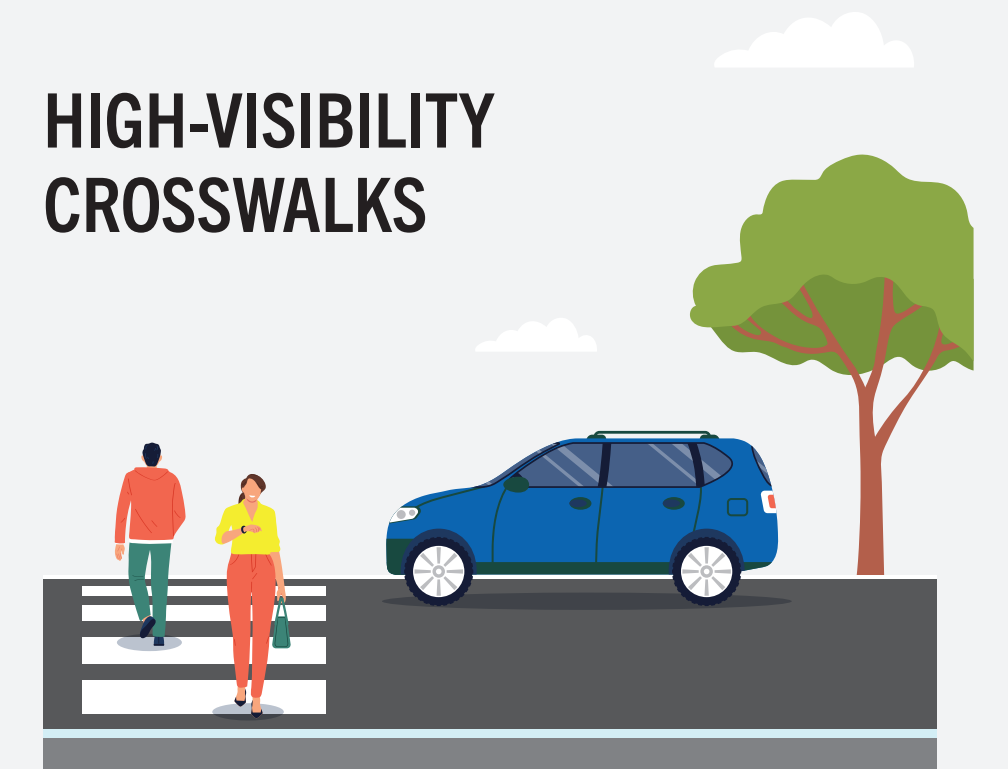

ROUNDABOUTS

BIKE LANES & PEDESTRIAN WALKWAYS

HIGH-VISIBILITY CROSSWALKS

DEDICATED TURN LANES

BUS STOP ENHANCEMENTS

While the project focuses on the intersections of SR 1 with Cypress Ave, California Ave, and 16th St, the project team is evaluating the entire stretch of SR 1 from just north of 16th St to just south of Marine Blvd. The evaluation may include additional intersections or improvements.
