To whom it may concern,

I am writing this in support of the proposed Kennel Permit and CDP to allow dog daycare on Clara's parcel. My family owns property next to Clara and we support her in this venture. For far too long people have been denied doing anything on their properties in this exact area. This is a beautiful area that will benefit from permitted activities such as this. Clara has invested time, money and effort in moving the kennel forward and it would be an asset in the area to allow her to move forward.

I believe it's important because denied property owners stop going to their properties and that turns into random property trespassers who engage in illegal garbage dumping and general harassment. In general property owners in that area should be encouraged and applauded to move forward with appropriate development and activities. It is clear that Clara Fassinger's request is something that would benefit the area.

sincerely,

Brian Overfelt
